PUAD 854 Innovation & Organizational Change (MPA Elective) Goodyear
Lawrence & Edwards sections available

*Course Descriptions

PUAD 432:Metropolitics & Macro Problems

Instructor: Cassandra Osei (GTA)

An interdisciplinary study of American cities, focusing on the rapidly changing demographic, physical, political, social, and economic changes. Sunbelt cities, edge cities, the rustbelt cities, planned and unplanned suburban communities, as well as declining center cities and newly revitalized downtowns are considered. Students will learn to address these changes and structures from a social determinants of health framework.

PUAD 639: Concepts of Civil Society

Instructor: Peter Federman (GTA)

Explores the evolution of civil society in the context of the American workplace, tracing the history of the labor movement, the decline of unions, and the rise of the sharing economy and start-up culture. Through this lens, concepts of community, social capital, and civil capacity building, and their relations to effective community functioning, democratic politics, and administrative expertise will be investigated.
